NEW LOW PRICES ON BIOPSY PUNCHES

Quick, Clean Cuts Every Time

When you need to quickly take minimally invasive, small samples, the biopsy punch is the right choice.

USES FOR BIOPSY PUNCHES

Biopsy punches are not restricted to dermatology. Think about taking patch recording samples, obtaining neuro transmitters for analysis, or taking skin samples. Forensic scientists can sample gels, films, paint chips and paper. Or, punch flow inlets in microfluidic chambers molded of PDMS (polydimethylsiloxane). You can even collect samples from the leaves, flowers and stems of plants for use in DNA isolation applications.

Replacement Tips for Reusable Rapid Biopsy Punch

- Designed for heavy, numerous and precise sampling operations up to 2000 punches

\$35

Limited Reuse Biopsy Punch

- Individual sterile packs
- Limited reuse

\$7

Reusable Rapid Punch Biopsy Kit

- Heavy duty reusable punch
- Designed for heavy, numerous and precise sampling operations up to 2000 punches
- Kit includes one tip and one plunger

\$150

Limited Reuse Punches Kit

- The kit includes 8 punches of various sizes
- Limited reuse

\$45

DID YOU KNOW?

Meet Dr. Xueji Zhang

Over the years WPI has had a long list of accomplishments, because we have some amazing people on our staff. For example, the notable expert in the area of electrochemical sensors, Xueji Zhang, PhD, Sr. Vice President and Chief Scientist at WPI, is leading the development for microsensors (including the ISO-H²S-100-Cxx 100µm H₂S microsensor) used for free radical detection and many other applications.

Visit our blog to find more about his work.
